

D-1 clock SL: front
Scale: 1" = 1'-0"

NOTE

- 12'-6" x 10'-6" oval clock
- this unit slides open and close (only SL and SR) up to 7'-0"
- a directional caster w/ lock brake would be fine but it leaves TD's discretion: Please talk with a designer what mechanism will be applied
- 2" rim around
- red area is a layer (1/2" or 1/4" thick plywood) on the unit
- letters can be cut by CNC machine
- CNC cut drawings are sent in dxf/dwg file
- each piece needs to be sanded to get as smooth surface as possible to look a steel material
- the sharp cutting edge needs to be rounded with router about 1/2" radius

D-2 clock SL: plan
Scale: 1" = 1'-0"
